

The inside secret  
Real-time maritime

Data is your most valuable asset:  
Start using it

AVEVA™ PI System™ gives marine & maritime companies real-time insight into operations to reduce cost, improve compliance, and sustain long-term success.

Improved efficiency

**BAE Systems**

Reduced fuel cost between 5% and 20%, resulting in annual savings of £35 to £140 million.

[Read more](#)

Remote asset monitoring

**Royal IHC**

Increased customer trust by using data to improve vessel efficiency and future equipment design.

[Read more](#)

Situational awareness

**Delfi ILS Solutions**

Crews are better able to operate vessels from day one using a scalable, cost-effective raring system.

AVEVA PI System is a holistic solution, integrating real-time data from across your operations.

450+ interfaces, means pervasive compatibility

Rapid integration for ERP, EAM, big data and cloud platforms

Over 65% of the Fortune 500 industrial companies rely on AVEVA PI System

Rich visual interfaces and cloud connectivity for better data sharing

“We are looking at improving vessel efficiency and changing operations, using condition-based maintenance, fuel consumption and emissions data. Around 60 KPIs have been developed.”

Adrian Skidmore

Platform Energy Manager, BAE Systems
